**CETCO**®  
A Minerals Technologies Company

# Delivering insights, helping you succeed

CETCO® is the construction technologies business unit of Minerals Technologies Incorporated, one of the world's largest minerals company with over two billion dollars in annual revenue. We offer solutions for commercial, industrial and infrastructure construction challenges worldwide. We provide expertise in transforming minerals and polymers into technologies that improve productivity and performance. From technical problem solving to on-site supervision, our team of scientists, researchers and field engineers consult with customers to develop practical solutions for challenging problems.

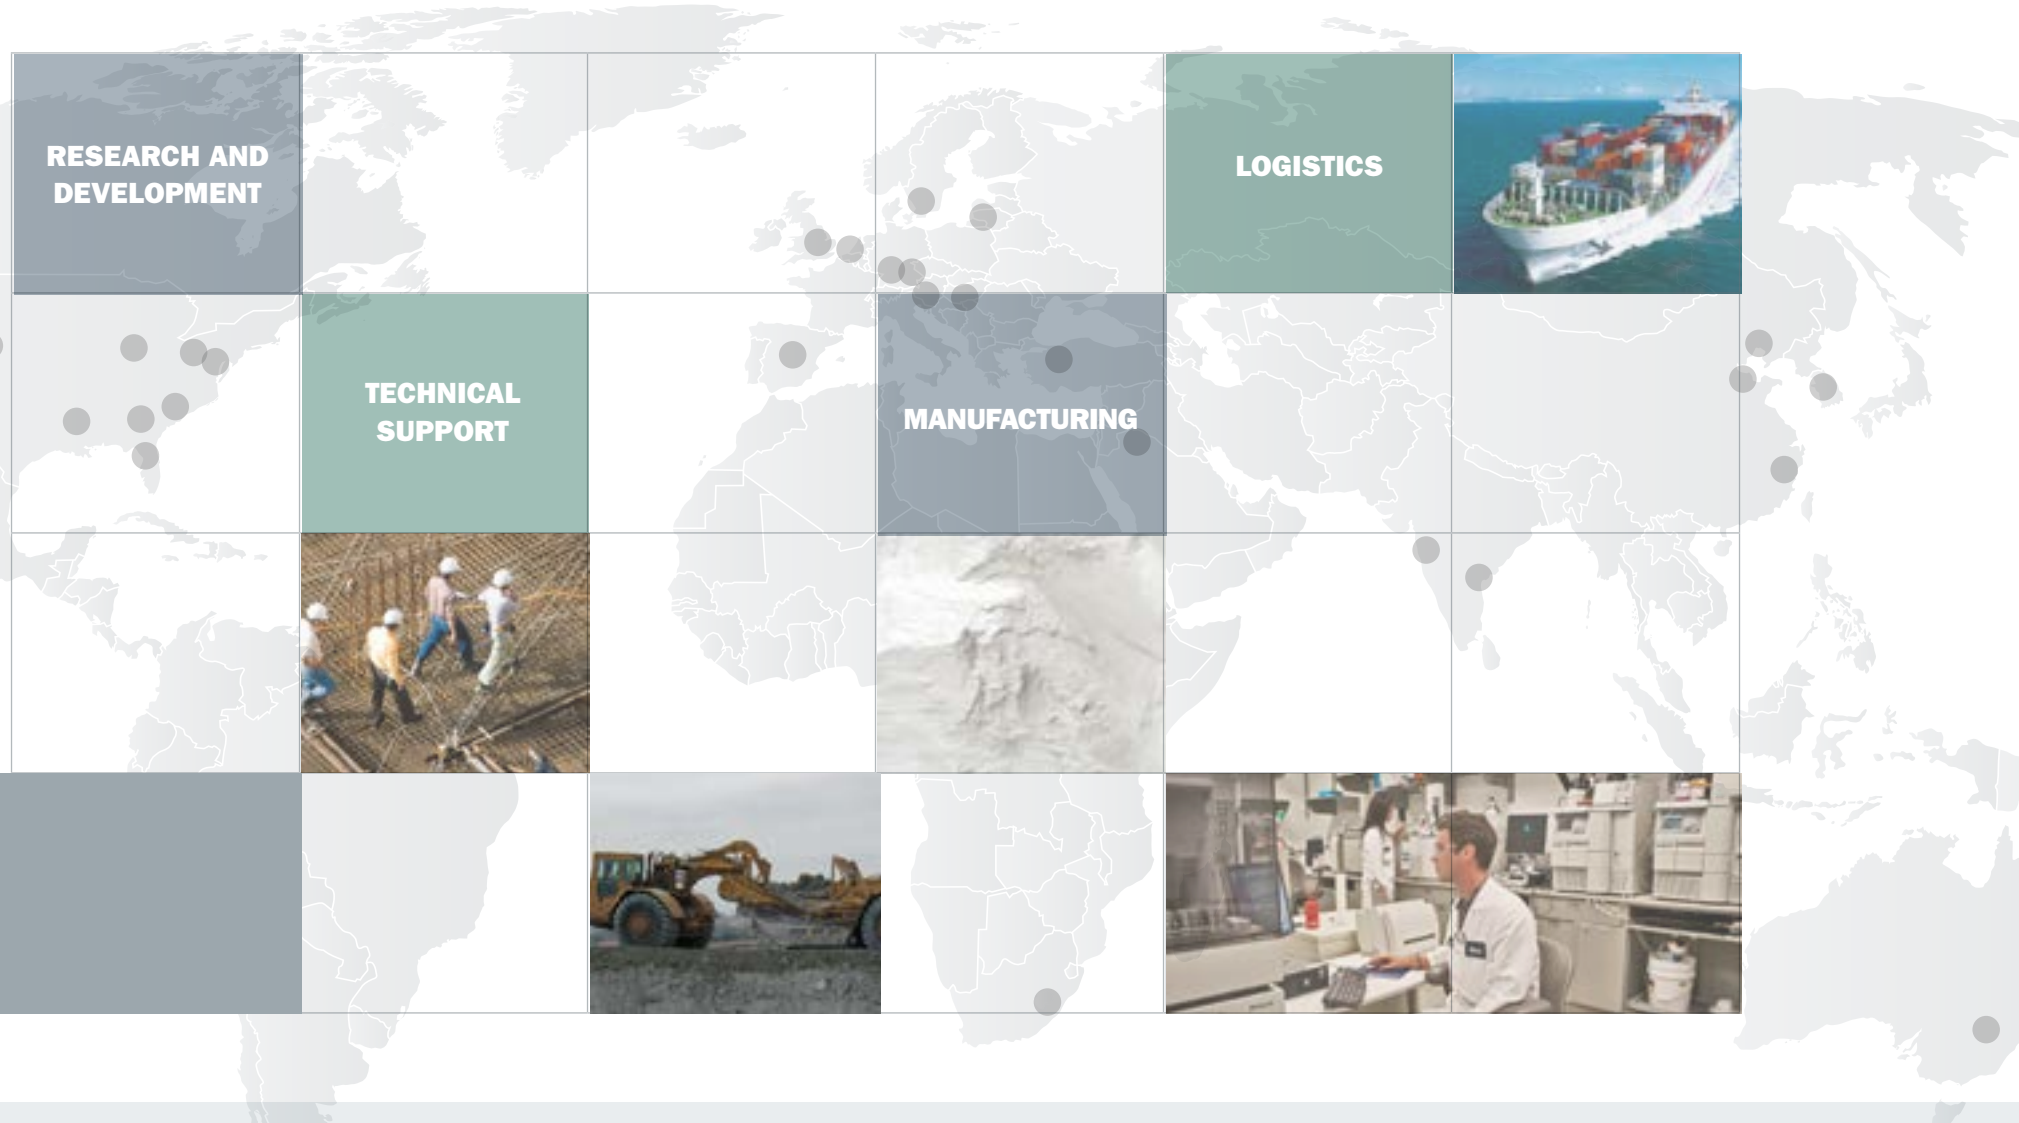

Through our unique combination of global reach, local support, industry leadership and research and development, CETCO supports the world's growing infrastructure needs while providing our customers

"CETCO continues to go above and beyond our expectations. CETCO maintains a professional approach when working through difficult situations, and work closely with all parties involved to make sure the job gets done right the first time."

- Jamie Hendricks, Power Construction Company, LLC, Chicago, IL

# Global reach

Strategically located people, mineral reserves, manufacturing and research facilities give us the ability to serve the toughest project demands.

# Supporting infrastructure around the world

**Through innovative products, industry knowledge and leadership—delivered with every project.**

---

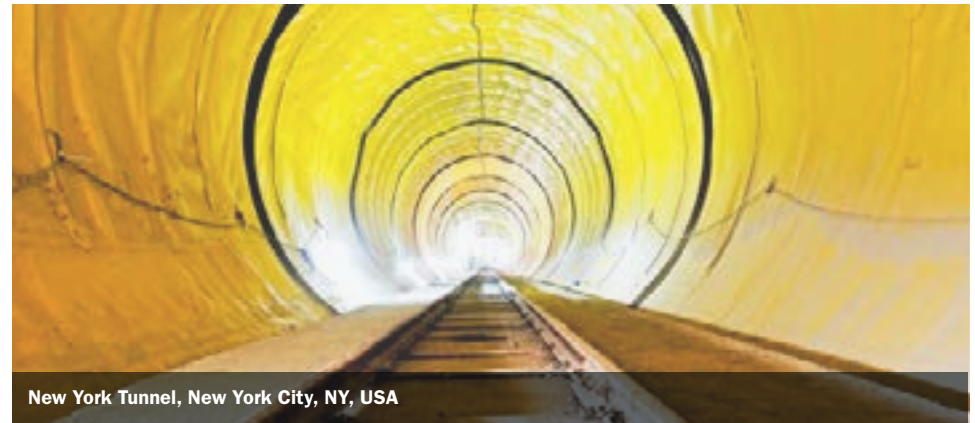

With the world's urban areas rapidly expanding, the safety and strength of our infrastructure has become more vital. For more than 50 years CETCO has provided the knowledge and expertise across a wide spectrum of industries and markets. From leading-edge green roof solutions to innovative lining and drilling products that help protect the environment, our forward thinking and high standards has helped CETCO deliver peace of mind with every project.

## Environmental Products

CETCO offers a range of Environmental Products to meet the needs of customers worldwide. Through careful evaluation of site conditions our helpful team of technical managers, scientists and engineers assist with the selection of the most appropriate solution for the project. Our support team can assist with issues ranging from project design to product application and logistics. Our capable team has been providing these services for 25 years to customers throughout the world.

## Drilling Products

For more than two decades, CETCO has been enhancing the cost effectiveness of non-oil and gas drilling operations by providing clients with superior products and the best on-the-job field service. When you drill with our products, we want to make sure that your team is trained on usage, mixing and the proper disposal. From product selection to education and training, we're doing so with our customer's success in mind.

# World-class research&development

**Setting new standards in product performance and application.**

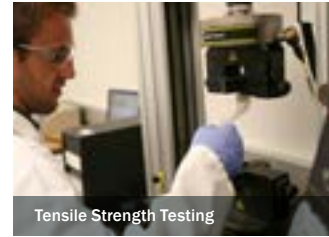

---

Our international team of clay mineralogists, chemists and polymer scientists, transforms ordinary minerals into extraordinary technology.

Our multidisciplinary research and development team creates new products and provides the support our customers need. Our growing portfolio of patents demonstrates our commitment to technological innovation across the markets that we serve. Established partnerships with many renowned research institutes and universities support our dedication to staying on top of global infrastructure challenges in our industry.

# Local support

CETCO is committed to providing service at the local level anywhere in the world.

## On-site support

Our field service and technical support teams are made up of engineers, geologists and architects that are experts in their field. CETCO and its experienced team can ensure success on any project where our product is used.

## Customer training

Educating our customers on industry best practices is one of our main objectives. Our field services and sales professionals are available to educate your team on industry leading products and applications.

## Quality assurance

The Hydroshield Quality Assurance Program is a systematic approach that ensures optimum, long-term waterproofing performance on every project. CETCO prides itself on holding our products to the highest standards.
