

AQUAFIN-IC

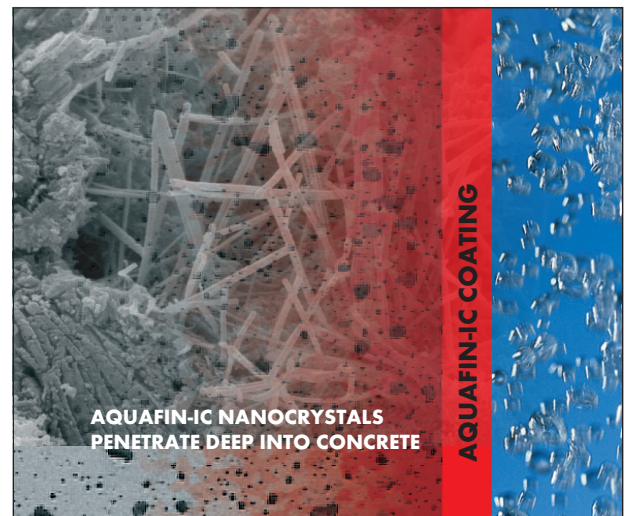

Crystalline Waterproof Coating for Concrete

Positive side and negative side waterproofing for:

- Below grade foundations
- Elevator pits
- Water tanks
- Water & WWTP
- Manholes
- Parking garages
- Slurry walls
- and so much more!

Advantages

- Advanced crystalline technology that penetrates deep into concrete
- Easy to use - just mixing with water
- Applied to damp substrate
- Permanently active - waterproofing properties stay intact
- Self healing crack technology
- Can be applied to green concrete as soon as forms are stripped
- Protects against fresh water, salt water, waste water & aggressive ground water
- Resists strong negative & positive hydrostatic pressure
- Environmentally friendly, norganic - non toxic, zero VOC's
- Potable water approved - NSF/ANSI 61

The chemistry in AQUAFIN-IC reacts with the concrete to grow crystals which penetrate into the structure providing a permanent seal. The same chemistry will also work to self-heal static shrinkage cracks.
