Made With Core4[®] Polymer Modified Technology

Experience unmatched roofing innovation with StormMaster[®] Shake, exclusively engineered using Core4[®] Polymer Modified Technology. These aren't your average asphalt shingles. When you choose a shingle with Core4[®], you're laying down the ultimate in roofing excellence.

PolyCore[®]

Made with a proprietary premium polymer modified blend, these shingles are more durable than standard asphalt. They are scientifically engineered to outperform and are stronger and longer-lasting than other leading brands.

52%

better fastener pull-through when compared to standard asphalt shingles

FlexCore[®]

With better elasticity, these shingles bend and flex, while others typically crack and tear. FlexCore[®] makes shingles more pliable, enabling them to install flatter and seal more effectively, providing greater protection for your home.

45%

better than the industry's standard tear strength requirement

69%

better granule adhesion compared to other standard asphalt shingles

Built to mitigate the effects of expansion and contraction due to temperature changes, these shingles have enhanced granule adhesion. Shingle granules play a critical role in protecting your roof.

ThermalCore[®]

127%

better performance on mechanical uplift lab test results than other products

Engineered with Core4[®] polymer modified technology and our unique FASTAC[®] sealant line, these shingles can withstand 150 mph winds and Class 4 rated hail, providing the ultimate protection.

WeatherCore[®]

StormMaster® Shake

Premium Protection with Exclusive Core4® Technology

1 Sweet Spot™ Nailing Area with FASTAC®

Our unique nailing area and double sealant line create a large fastening area and strong bond that can withstand 150 mph winds.

2 HP42® Technology

A wider, taller format provides more coverage, requires fewer nails, minimizes material waste, and reduces labor time during installation. And a 6" exposure offers a bold architectural look with stunning curb appeal.

7 Class 4 / Excellent Impact Ratings

StormMaster® Shake shingles are UL 2218 Class 4 impact rated, the highest rating awarded to asphalt shingles. The qualification test simulates a 2" hailstone falling from the sky, where the shingle must show no evidence of fractures or cracks.

Standard Asphalt Products

INNOVATIVE PREMIUM ASPHALT SHINGLES FOR

7

Key Features Built Into Every Shingle

3 Class A Fire Resistance

With a Class A rating, StormMaster® Shake shingles meet the highest fire-resistance standard for roofing materials. This means your roof is made from materials that help slow down the spread of fire.

4 Core4® Polymer Modified Technology

With Core4® you get the most innovative asphalt technology available, offering premium protection against high winds, extreme temperatures, and serious hail.

5 3M™ Smog-Reducing Granules

These innovative shingles are made with unique granules that convert harmful nitrogen oxide gases into plant friendly nitrates that wash away with the rain.

A roof with these shingles has the smog-fighting capacity of 2-3 trees.

6 Scotchgard™ Protector by 3M

Offering a lifetime limited warranty against ugly black streaks caused by algae, StormMaster® Shake shingles feature Scotchgard™ Protector by 3M, a brand you know and trust. With over 1.5 million homes protected, StormMaster® Shake shingles are the premium choice for lasting curb appeal.

UNPARALLELED STYLE AND PERFORMANCE

Beauty, Strength, and Sustainability

StormMaster® Shake shingles are available in a variety of vivid, high-definition colors that will complement any home's exterior. These designer colors are inspired by our natural world, and preserved with Scotchgard™ Protector by 3M. These bold colors will be an integral part of your home when you choose a roof from the StormMaster® Shake color palette. Why choose between beautiful lasting color and protection, when you can have it all?

Weathered Wood

Morning Harvest

To provide homeowners with the most accurate representation of color options, several photo scans and house shots were utilized in numerous lighting conditions. Variations in lighting illustrate the color gradients on asphalt shingle roofs.

Color blends vary from shingle to shingle. Before installation, consult with your contractor and request to view the actual shingles being installed on your roof to ensure confidence in your final color selection.

Dreaming of a Home Redesign?

Get creative with the Atlas Roof Inspiration Center. In the Roof & Home Design Studio, you can upload photos of your home and swipe to visualize different looks. With the Visual Product Selector, explore Atlas shingle styles, features, and colors to help you visualize and choose the perfect roof for your home.

AtlasRoofing.com/Roof-Inspiration

* The Solar Reflectance Index (SRI) is an indicator of the ability of a roof surface to return solar energy to the atmosphere. Roofing material surfaces with a higher SRI will be cooler than surfaces with a lower SRI under the same solar energy exposure, especially on a sunny day. Using materials with higher SRI values can enhance building occupant comfort and reduce air conditioning use. For more information, please reference the Cool Roof Rating Council: CoolRoofs.org

StormMaster® Shake

Premium Protection with Exclusive Core4® Technology

StormMaster® Shake premium architectural shingles are available in a stunning array of high-definition colors that offer outstanding protection against damaging hail and high winds. These designer shingles feature the added benefit of smog-reducing technology, ensuring the long-term protection of your home, thanks to the most complete and innovative shingle on the market.

Demand Peak Coverage

When you install an Atlas Signature Select® roofing system¹, all the components are designed for — and backed by — the industry's best warranty coverage. Unlike many other roofing warranties that over promise and under deliver, Atlas packs value and assurance into an enhanced premium protection period. This includes non-prorated labor and materials, tear-off and disposal fees, coverage of the full Atlas product system, and transferability.

Increase your premium protection period by installing an Atlas Signature Select® Roofing System
