Structural Punchout

East Coast / Central punch spacing:
Center of punchoutss are
12" from lead end, then 24" o.c.

West Coast punch spacing:
Center of punchouts are
24" from lead end, then 24" o.c.

Center of tail end punchout not less
than 12" from end of stud.

If lateral bracing is required for
head-of-wall deflection track and a
punchout is not spaced 12" from the top of
stud, use strapping and blocking in lieu of
CRC or Spazzer Bar lateral bridging.

If custom punchout patterns are required,
contact ClarkDietrich Sales or local plant
for requests.
