Re: **Diamond Clear™ VOX®** – LEED™ Product Information

To Whom It May Concern:

Diamond Clear VOX has a volatile organic compound (VOC) content of **53 g/L** (grams per liter.)

Diamond Clear VOX is manufactured in **Kirkland, IL**. If **Kirkland, IL** falls within a 500-mile radius of the project site, the product is considered to be a locally produced material and can help contribute to earning (MR) Regional Materials Credit.

No single extracted material is used to produce the majority of this product. Additionally, all raw materials come from one of several sources which in-turn come from one of several raw material feed stocks. As such, point source for the raw materials cannot be determined.

Diamond Clear VOX does not contain any pre- or post-consumer or industrial recycled content.

If you have any further questions please contact technical support at 800-321-7628.

Sincerely,

Euclid Chemical Technical Support
