

Dry Wall Joint Tape

[Download Material Safety Data Sheet](#)

[BACK TO PRODUCTS](#)

Drywall Joint Tape is a quality tape designed for use with joint compound to reinforce Gypsum board joints and corners prior to painting, texturing or wallpapering.

- Tape is manufactured from a special fibered-paper with added tensile strength to help prevent tearing, wrinkling or stretching.
 - Joint tape is available with Spark perforations, which help prevent blistering.
 - Tape is roughed on both sides for superior bonding and holding power.
 - Tape has precision-matched center-crease for easy and accurate corner applications.
 - Designed for use with all quality joint compounds on the market today.
-
- Tape should always be stored in closed cartons at normal room temperatures in an enclosed dry area.
-
- When applying Drywall Joint Tape, follow the printed recommendations of the compound manufacturer. Apply tape only within their recommended minimum and maximum temperature range.
-
- Follow printed instructions on the joint compound container for mixing (if necessary) and use of compound prior to and during tape application.
