EcoWhite™ QuickSeam™ Pipe Flashing

Item Description
White Molded Pipe Flashing

Item Number
W56358106A

Product Information

Description:

Firestone EcoWhite EPDM QuickSeam Pipe Flashings are specifically designed to be used in roofing applications for flashing of round penetrations. EcoWhite EPDM QuickSeam Pipe Flashings will fit various penetrations from 1" (25 mm) to 6" (152 mm) and must be cut to correct pipe diameter before installation. EcoWhite EPDM QuickSeam Pipe Flashings may be used to flash penetrations on EcoWhite EPDM and TPO installations (refer to UltraBlend specifications for more information on using QuickSeam products on TPO systems).

Method of Application:

1. Clean and prime the membrane to receive the tape flange using Single-Ply QuickPrime™ Primer or Single-Ply LVOC Primer with a QuickScrubber™ or QuickScrubber Plus pad and handle to remove all dusting agent, dirt and other contaminants that will affect the finished bond.
2. Allow the primer to dry completely according to the touch-push test.
3. Cut along the top edge of the ring on the EcoWhite QuickSeam Pipe Flashing corresponding to the size of the pipe.
4. Remove the release paper.
5. Install the pipe flashing and roll the flange with a silicone hand roller.
6. Install the clamping ring and EcoWhite EPDM Lap Sealant or Firestone AP Sealant per Firestone Specifications.

Storage:

- Store in original unopened containers indoors at temperatures between 60 °F (16 °C) and 80 °F (27 °C).
- Do not store on roof in direct sunlight or at temperatures above 80 °F (27 °C).
- When exposed to lower temperatures; restore to room temperature prior to use.

Shelf Life:

- Shelf life of 24 months can be expected when stored in original container at temperatures between 60 °F (16 °C) and 80 °F (27 °C).
- Shelf life will be shortened if exposed to elevated temperatures.

Precautions:

- Do not install on uneven substrates.
- Refer to Safety Data Sheet (SDS).

Packaging:

Each carton contains 10 pipe flashings, 10 stainless steel clamps
