

SAFETY DATA SHEET

1. Identification					
Product identifier	WOOD PRODUCTS (PMDI BONDED)				
Product list	Temstock Free, Temstock Free MR, Temstock MR,				
	 UltraStock MDF produced with pMDI resin Shelving, UltraStock Free, UltraStock Free MR, Ultrastock HD				
	DryGuard® OSB Sturd-I-Flo		stock, FiberStrong® Rim Board, DryMax® Cargo		
	FiberStrong HD ™ (Mill#s 531, 532, 530, 475), Blue Ribbon® (Mill#s 531, 532, 530, 475), Camouflage Panel Featuring Mossy Oak ® (Mill#s 531, 475), Realtree Camouflage Panel ® (Mill#s 531, 475), Thermostat® OSB Radiant Barrier Roof Sheathing (Mill# 531, 475), ForceField® Weather Barrier System (Mill#s 475, 500, 531)				
		X			
			nsed to Georgia-Pacific Wood Products LLC orgia-Pacific Wood Products LLC		
Other means of identification SDS number	GP-34B				
Recommended use	Building Materials - Decorat	ive			
Recommended restrictions	None known.				
Manufacturer/Importer/Supplier/I	Distributor information				
Company name Address	Georgia-Pacific Wood Products LLC 133 Peachtree Street, NE Atlanta, GA 30303				
Telephone	Technical Information MSDS Request	800.284.5347 404.652.5119			
E-mail	Not available.				
Emergency phone number	Chemtrec - Emergency	800.424.9300			
2. Hazard(s) identification					
Emergency overview		nstream activities (hich it is shipped by the manufacturer but may e.g., grinding, sanding, cutting, pulverizing) that scribed below.		
Physical hazards	Not classified.				
Health hazards	Eye irritation		Category 2B		
	Sensitization, respiratory		Category 1		
	Sensitization, skin		Category 1A		
	Carcinogenicity		Category 1A		
	Specific target organ toxicity, single exposure				
	Specific target organ toxicity exposure	y, repeated	Category 1 (respiratory system)		
Environmental hazards	Not classified.				
OSHA defined hazards	Combustible dust				
Label elements					
Signal word	Danger				

Hazard statement	May cause an allergic skin reaction. Causes eye irritation. May cause allergy or asthma symptoms or breathing difficulties if inhaled. May cause respiratory irritation. May cause cancer. Causes damage to organs (respiratory system) through prolonged or repeated exposure. If small particles of wood dust are generated during further processing, handling or by other means, may form combustible dust concentrations in air.			
Precautionary statement				
Prevention	Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves/protective clothing/eye protection/face protection. Wear respiratory protection. Do not breathe dust/fume/gas/mist/vapors/spray. Do not eat, drink or smoke when using this product. Wash thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace. Use only outdoors or in a well-ventilated area. Prevent dust accumulation and airborne dispersion of dust to minimize flash fire and explosion hazard. Keep away from heat/sparks/open flames/hot surfaces No smoking.			
Response	If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. If on skin: Wash with plenty of water. If skin irritation or rash occurs: Get medical advice/attention. Wash contaminated clothing before reuse. If inhaled: Remove person to fresh air and keep comfortable for breathing. If experiencing respiratory symptoms: Call a poison center/doctor. If exposed or concerned: Get medical advice/attention. In case of fire: Use appropriate media to extinguish.			
Storage	Store in a well-ventilated place. Store away from incompatible materials (see Section 10 of the SDS).			
Disposal	Dispose of contents/container in accordance with local/regional/national/international regulations.			
Hazard(s) not otherwise classified (HNOC)	None known.			
Supplemental information	None.			
3 Composition/information on ingradiants				

3. Composition/information on ingredients

Mixtures

Chemical name	Common name and synonyms	CAS number	%
WOOD/WOOD DUST		Not Assigned	80 - 100
METHYLENE BISPHENOL ISOCYANATE (MDI)		101-68-8	1 - 5
POLYMERIC MDI (pMDI)		9016-87-9	1 - 5
2,4'-DIPHENYL METHANE DIISOCYANATE		5873-54-1	0.1 - 1
Other components below reportable	levels		0.5 - 1.5

The specific chemical identity and/or percentage of composition has been withheld as a trade secret.

4. First-aid measures

Inhalation	Remove from area of exposure. If the affected person is not breathing, apply artificial respiration. If persistent irritation, severe coughing or breathing difficulty occurs, seek medical attention.
Skin contact	If irritation develops, wash with soap and water. If skin irritation or rash occurs: Get medical advice/attention. Wash contaminated clothing before reuse.
Eye contact	Do not rub eyes. Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention if irritation develops and persists.
Ingestion	If wood or wood dust is swallowed, get immediate medical attention or advice Do not induce vomiting.
Most important symptoms/effects, acute and delayed	Irritation of eyes. Exposed individuals may experience eye tearing, redness, and discomfort. May cause an allergic skin reaction. Dermatitis. Rash. May cause respiratory irritation. Difficulty in breathing.
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.
General information	If you feel unwell, seek medical advice (show the label where possible). Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Wash contaminated clothing before reuse.
E Eiro fighting massures	

5. Fire-fighting measures

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2). Apply extinguishing media carefully to avoid creating airborne dust. Avoid high pressure media which could cause the formation of a potentially explosible dust-air mixture.

Unsuitable extinguishing media	Heavy water (or jet) stream may cause dust to become airborne and create a flash fire hazard or an explosive atmosphere.
Specific hazards arising from the chemical	Explosion hazard: Avoid generating dust; fine dust dispersed in air in sufficient concentrations and in the presence of an ignition source is a potential dust explosion hazard. During fire, gases hazardous to health may be formed.
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
Fire fighting equipment/instructions	In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk.
Specific methods	To avoid dust clouds, responders should use the extinguisher from as far away as possible and apply the extinguishing agent as gently as possible. The main considerations with hose stream operation are to avoid creating combustible dust clouds or introducing more air. In particular, the use of solid streams and direct dust pile hits can disperse dust into the air creating a potential flash fire hazard. The best way to apply water is in a medium to wide-pattern, as gently as possible. Responders should use a low nozzle pressure and loft the stream onto the burning material from as far away as the stream will reach.
General fire hazards	May form combustible dust concentrations in air.
6. Accidental release meas	sures
Personal precautions, protective equipment and emergency procedures	Use only non-sparking tools. Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Wear appropriate protective equipment and clothing during clean-up. Ensure adequate ventilation.
Methods and materials for containment and cleaning up	Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Take precautionary measures against static discharge. Use only non-sparking tools. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air). Vacuum dust with dust ignition proof vacuum or wet sweep small wood pieces and dust; place in appropriate container for disposal. Gather larger pieces by an appropriate method. Reduce airborne dust by use of wet methods (e.g. water mist) and prevent scattering by moistening with water. For waste disposal, see section 13 of the SDS.
Environmental precautions	Avoid discharge into drains, water courses or onto the ground.
7. Handling and storage	
Precautions for safe handling	Dust can form an explosive mixture in air. Provide appropriate exhaust ventilation at machinery and at places where dust can be generated. Minimize dust generation and accumulation. Avoid significant deposits of material, especially on horizontal surfaces, which may become airborne and form combustible dust clouds and may contribute to secondary explosions. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. If flash fire or explosion hazard is present, wear flame resistant clothing and face/head protection. Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations. Provide adequate precautions, such as electrical grounding and bonding, or inert atmospheres. Keep away from heat/sparks/open flames/hot surfaces No smoking. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Wear appropriate personal protective equipment. Use personal protective equipment as required. Ensure dust collection systems used for conveying combustible wood dusts are protected with and equipped with fire and explosion prevention and protection equipment. See NFPA 664 and NFPA 69 for further requirements, information and guidance.
Conditions for safe storage, including any incompatibilities	Store flat, supported and protected from direct contact with the ground. Store away from incompatible materials (see Section 10 of the SDS). Store in a cool dry place.

8. Exposure controls/personal protection

Occupational exposure limits

Respirators should be selected by and use under the direction of a trained health and safety professional following requirements found in OSHA's respirator standard (29 CFR 1910.134) and ANSI's standard for respiratory protection (788.2)		
onsiderations as washing after handling the material and before eating, of wash work clothing and protective equipment to remove co	у.		
	When using, do not eat, drink or smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.		
. Physical and chemical properties			

Appearance	Rigid boards or panels
Physical state	Solid.
Form	Solid wood
Color	Various
Odor	Not available.
Odor threshold	Not available.

рН	Not applicable
Melting point/freezing point	Not applicable
Initial boiling point and boiling	Not available.
range	
Flash point	Not applicable
Evaporation rate	Not applicable
Flammability (solid, gas)	Not available.
Upper/lower flammability or exp	
Explosive limit - lower (%)	40 g/cm3 for wood dust (Note: The LEL is quivalent to the Minimum Explosive Concentration (MEC) for the combustible dust. The MEC will vary with particle size of the wood dust. Recommend MEC testing for specific wood dust particle sizes generated or handled.)
Explosive limit - upper (%)	Not available
Vapor pressure	Not applicable
Vapor density	Not applicable
Relative density	Not available.
Solubility(ies)	
Solubility (water)	Insoluble
Partition coefficient (n-octanol/water)	Not applicable
Auto-ignition temperature	> 399.92 - < 500 °F (> 204.4 - < 260 °C) for wood
Decomposition temperature	Not available
Viscosity	Not available.
Other information	
Bulk density	Not applicable
Dust explosion properties	
St class	1 Weak explosion.
Explosive properties	Not explosive.
Flash point class	Combustible
Oxidizing properties	Not oxidizing.
Specific gravity	Variable
10. Stability and reactivity	
Reactivity	The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability	Material is stable under normal conditions.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Conditions to avoid	Dust accumulation, dispersion of dust in air, high temperatures, open flame, sparks, or other sources of ignition.
Incompatible materials	Strong acids, alkalies, oxidizing agents and drying oils.
Hazardous decomposition products	Thermal decomposition may emit irritating fumes or gases of carbon monoxide, carbon dioxide, aldehydes, or organic acids.
11. Toxicological informat	ion
Information on likely routes of e	xposure
Inhalation	May cause irritation to the respiratory system. May cause allergy or asthma symptoms or breathing difficulties if inhaled. Prolonged inhalation may be harmful.
Skin contact	May cause an allergic skin reaction.
Eye contact	Causes eye irritation.
Ingestion	Not applicable under normal conditions of use. May result in obstruction or temporary irritation of the digestive tract.
Symptoms related to the physical, chemical and toxicological characteristics	Irritation of eyes. Exposed individuals may experience eye tearing, redness, and discomfort. Dusts may irritate the respiratory tract, skin and eyes. Difficulty in breathing. May cause an allergic skin reaction. Dermatitis. Rash.

Carcinogenicity	Wood dust generated from sawing, sanding or machining this product may cause nasal dryness, irritation, coughing and sinusitis. The International Agency for Research on Cancer (IARC), and National Toxicology Program (NTP) classifies wood dust as a carcinogen. This classification is based on the increased occurrence of adenocarcinomas of the nasal cavities and paranasal sinuses associated with exposure to wood dust. The evaluation noted insufficient evidence to associate cancers of the oropharynx, hypopharynx, lung, lymphatic and hematopoietic systems, stomach, colon, or rectum with exposure to wood dust.

13. Disposal considerations

Disposal instructions	Under RCRA, it is the responsibility of the user of the product to determine, at the time of disposal, whether the product meets RCRA criteria for hazardous waste.			
Local disposal regulations	Dispose in accordance with all applicable regulations.			
Hazardous waste code	The waste code should be assigned in discussion between the user, the producer and the waste disposal company.			
Waste from residues / unused products	Dispose of in accordance with local regulations.			
Contaminated packaging	Empty packaging/container can be disposed in accordance with all applicable regulations.			

14. Transport information

DOT

Not regulated as dangerous goods.

IATA

Not regulated as dangerous goods.

IMDG

Not regulated as dangerous goods.

Transport in bulk according to Not applicable. Annex II of MARPOL 73/78 and the IBC Code

15. Regulatory information

```
US federal regulations
```

Wood and wood products are considered manufactured articles and are exempt under OSHA's Hazard Communication Standard 29 CFR 1910.1200. Wood dust, a by-product generated from sawing, sanding or machining wood and wood products, is considered hazardous and is regulated under the Hazard Communication Standard 29 CFR 1910.1200.

WOOD PRODUCTS (PMDI BONDED

Hazard statement

particles of wood dust are generated during further processing, handling or allergy or asthma symptoms or breathing difficulties if inhaled. May cause respiratory system) through prolonged or repeated exposure. If small May cause an allergic skin reaction. Causes eye irritation. May cause respiratory irritation. May cause cancer. Causes damage to organs oy other means, may form combustible dust concentrations in air.

Precautionary statement

Prevention

Contaminated work clothing must not be allowed out of the workplace. Use gloves/protective clothing/eye protection/face protection. Wear respiratory only outdoors or in a well-ventilated area. Prevent dust accumulation and drink or smoke when using this product. Wash thoroughly after handling. protection. Do not breathe dust/fume/gas/mist/vapors/spray. Do not eat, airborne dispersion of dust to minimize flash fire and explosion hazard. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective

Response

If in eyes: Rinse cautiously with water for several minutes. Remove contact enses, if present and easy to do. Continue rinsing. If eye irritation persists: rritation or rash occurs: Get medical advice/attention. Wash contaminated Get medical advice/attention. If on skin: Wash with plenty of water. If skin comfortable for breathing. If experiencing respiratory symptoms: Call a clothing before reuse. If inhaled: Remove person to fresh air and keep advice/attention. In case of fire: Use appropriate media to extinguish. poison center/doctor. If exposed or concerned: Get medical

Storage

Store in a well-ventilated place. Store away from incompatible materials see Section 10 of the SDS)

Disposal

Dispose of contents/container in accordance with ocal/regional/national/international regulations.

Georgia-Pacific Wood Products LLC 133 Peachtree Street, NE Chemtrec - Emergency : 800.424.9300

sawing, sanding or machining wood and wood products, is considered hazardous and is regulated Wood and wood products are considered manufactured articles and are exempt under OSHA's Hazard Communication Standard 29 CFR 1910.1200. Wood dust, a by-product generated from under the Hazard Communication Standard 29 CFR 1910.1200.

California Proposition 65

WARNING: Drilling, sawing, sanding or machining wood products can expose you to wood dust a substance brown to the other of the substance brown to the inhaling wood dust, or use a dust mask or other safeguards for personal srotection. For more information go to: www.P65Warnings.ca.gov/wood
