GRABBER®
CONSTRUCTION PRODUCTS

Chisel Point

Description

Construction staples for quick fastening of construction materials.

Specifications

Size | Gauge: 23 to 18

Length: 1/2 in. to 2 1/2 in.

Crown Size: 3/16 in. to 1 in.

Point Type: Chiseled

Finish: Electrogalvanized,
Mechanically Galvanized

Quality Assurance: Grabber® fasteners are manufactured in ISO 9001 and ISO 14001 certified and approved factories.

LEED Reporting: The post-consumer recycled steel content is 25%.

Compliance: The fasteners comply with ASTM F1667 performance requirements.

Applications

Narrow Crown

- Molding
- Cabinets
- Trim
- Paneling
- Drawer Construction
- Upholstery
- Gift Boxes

Medium Crown

- Furniture
- Pallet/Crate Construction
- Sheathing
- Subflooring
- Roof Material

Wide Crown

- Roof Material
- Packaging

Installation

- Ensure that the crown size and the gauge match the specifications for the stapler being used.
- Always load the stapler with the chiseled point facing away from the handle of the stapler.
- It is best to drive the staple at a 90° angle to the work surface.
- When choosing the staple length, multiply the length of the material being fastened by three, or the closest shorter leg length.
- For thin material such as fabric or cloth, add 3/16 in. for the staple length, or the closest shorter leg length.
- For hard materials, it is recommended to double the thickness of the material, or the closest shorter leg length.

Features

- Narrow crown staples for low visibility finishing on cabinetry and furniture building.
- Medium crown staples for a larger area, often used in home construction.
- Wide crown staples are used when visibility is not an issue, and they are mainly used in construction and packaging.
- Electrogalvanized staples have a thin layer of zinc for added protection against corrosion.
- The chiseled point penetrates the wood quickly.

Product Dimensions

Gauge	Wire Diameter
23	0.031 in.
22	0.022 in.
20	0.019 in.
18	0.044 in.
16	0.055 in.
