

Tackboard Panels

- Made from 98% recycled content
- Velvet-soft textured, sanded panels
- Lightweight and cost effective
- Easy to cut and use

PINNACLE™ Tackboard Panels

PINNACLE is Homasote's finely sanded, soft-textured tackboard for interior and protected exterior use.

Its velvet finish is popular with schools, hospitals, museums and for all types of design and display work. PINNACLE has the high pin-retention and durability of Homasote® with an elegance that requires little or no additional finishing or edge treatment.

PINNACLE 440 standard tackboard

A classic board for interior and protected exterior use, ready for immediate use for all display applications. No additional finishing is necessary. For customized work, PINNACLE is ready to receive fabrics, wall coverings, paint or dye. These boards are the latest generation of Homasote panels that have been the benchmark for pin-retention characteristics for nearly a century.

PINNACLE N.C.F.R., Class A Fire-tested board

Unlike surface-treated products, PINNACLE N.C.F.R. boards achieve reaction-to-fire qualities using a unique manufacturing process that mixes fire retardant chemicals evenly throughout the board. They are perfect for general display work in schools, hospitals, all public access areas and whenever superior aesthetic and fire-retardant qualities are required in a single board.

Product Range

	Thickness	Edge Detail	Size	Weight
PINNACLE 440	1/2"	square	4' x 8'	1.2 lbs/sq. ft
PINNACLE N.C.F.R.	1/2"	square	4' x 8'	1.5 lbs/sq. ft

Sensible. Sound. Solutions.

Consult the most recent Homasote PINNACLE™ installation instructions for complete details and directions.
