

Technical Bulletin No. 009

LP® SmartSide® Lap Siding Installed over Progressive Foam Technologies (PFT) Linebacker Sheathing

LP evaluated the performance of SmartSide lap siding over Linebacker foam sheathing. The results of the evaluation suggest that the Linebacker sheathing does not impede the performance of the siding. Therefore, use of the SmartSide siding over the Linebacker sheathing is permitted.

Please refer to the respective SmartSide lap siding instructions at www.lpcorp.com for proper product application. Contact PFT for proper application of the Linebacker foam sheathing.
