

Gold Bond® Super-White Moulding Plaster

09 26 13 / NGC

Technical Information
800.NATIONAL • 800.628.4662

DESCRIPTION

Gold Bond® Super-White Moulding Plaster is a very white finely ground gypsum, primarily used for all kinds of ornamental plaster work. Because of its low expansion, excellent strength and hardness, it is specially adaptable for casting in rubber, gelatin and other types of molds. For casting purposes, only water is added. For run-in-place ornamental work, such as cornices, the moulding plaster is used with lime putty, mixed two parts hydrated lime to one part moulding plaster by weight.

Complies with ASTM C59

Super-White Moulding Plaster contains no asbestos.

LIMITATIONS

- Not for exterior use.
- Water used for mixing moulding plaster must be potable and free of mineral or organic impurities that could affect the plaster or the set time.
- Super-White Moulding Plaster must be kept dry both in storage and on the job. It must be stored off the ground, under cover and away from moisture sources.

TECHNICAL DATA

| Physical Properties | |
|---------------------|--|
| Bag Weight | 49.5 lb. (22.5 kg) |
| Approx. Set Time | 45 minutes |
| Water Ratio | 15-18 qts. per bag, for casting purposes |
