

chemical solutions to concrete problems

# CHEMBETON

FORM RELEASE AGENT

## WHY YOU SHOULD GIVE CHEMBETON A TRY!

CHEMBETON

- Mild odor
- Provides a crisp, positive release
- Resists wash-off
- Can be applied up to three weeks before concrete pour
- Meets all federal, state and Canadian VOC requirements (excluding SCAQMD of California)
- One grade for year-round sprayability

COMPETITOR PRODUCTS

- Have a strong odor
- Most require winter and summer grades for year-round sprayability

You want best-in-class release agents, but at a lower cost. Among the lowest-price point petroleum-based release agents, Nox-Crete's Chembeton offers the best performance AND the best value.

Chembeton is the ideal choice among low cost-per-gallon release agents for medium-density overlaid plywood, plywood-faced handset forms, B-B plywood, steel and aluminum forms.

**Chembeton is endorsed by leading North American plywood mills for entry-level BB & MDO!**

If you're buying a low-cost, petroleum-based release agent, we will match or beat their price.

For more information call: 402-341-2080

## APPLICATION FRIENDLY

Chembeton can be readily applied with commonly used, low-pressure sprayers or higher pressure sprayers can be used to optimize application rates and overall performance.
