

chemical solutions to concrete problems

## STAIN, SEAL AND PROTECT CONCRETE NOX-CARB

**Nox-Carb** is a penetrating, breathable, water repellent stain and sealer for concrete and masonry. **Nox-Carb** combines a 100% low molecular weight methyl methacrylate acrylic resin with a patented silane to provide a dual line of defense that chemically protects substrates to prevent water entry while allowing water vapor transmission to occur unimpeded.

## ADVANTAGES OF NOX-CARB

- Vibrant color is U.V. resistant and will not fade, chalk or peel
- Provides enhanced resistance to water absorption and prevents freeze/thaw damage
- Sealed surfaces become self-cleaning with rain
- Penetrates into capillaries and micro-pores and chemically reacts to form a weather-proof, protective barrier
- Allows treated substrate surfaces to breathe
- Texture additive options available for improved masking of substrate surface defects
- Reduces efflorescence on all treated surfaces
- Protects against chloride ion absorption

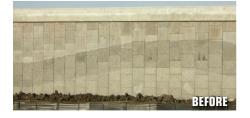

Applies easily using roller, brush or airless sprayer.

TEST DATA Nox-Carb	
Adhesion ASTM D-4541	600 psi
Water Absorption ASTM C-642	After 48 Hours <0.40%
Water Absorption ASTM D-6489	24 Hours >95% Reduction 48 Hours >94% Reduction
Water Absorption, Rilem Tube Method	Concrete Block 95% Reduction Precast Concrete 96% Reduction
Water Vapor Transmission ASTM D-1653, Method B, Condition A	2.4 grains/ft2/hr (40.3 grams/m2/24 hrs)
Water Vapor Permeance ASTM D-1653, Method B, Condition A	5.8 Perms (3.8 Metric Perms)

## STANDARD COLORS

CUSTOM COLORS AVAILABLE CALL 402.341.2080 FOR DETAILS

## IDEAL USES FOR NOX-CARB

tilt-up
precast
cast-in-place
concrete masonry
brick masonry
bridges
warehouses
offices
food processing plants
retaining walls
retail shops
convention centers
stadiums
