

PRO-TWIST MSDS EXEMPTION

PrimeSource Building products is responsible for the manufacturing and distribution of Pro-Twist Construction Fasteners.

Pro-Twist Fasteners are exempt from the Material Safety Data Sheet (MSDS) requirements under the Hazard Communication Standard (29 CFR 1910.1200) due to the fact that fasteners are classified as “articles” by the Occupational Safety and Health Administration (OSHA).

Section 29 CFR 1910.1200(c) defines an “article” as a manufactured item other than a fluid or particle: (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not release more than very small quantities, e.g., minute or trace amounts of a hazardous chemical (as determined under paragraph (d) of this section), and does not pose a physical hazard or health risk to employees.

Pro-Twist fasteners, defined as articles, are exempt from the Hazard Communication Standard 29 CFR 1910.1200 (b)(6)(v), and therefore will not require a MSDS or SDS for OSHA compliance.
