## **SECTION 1. IDENTIFICATION**

| Product name  | : | Sikalastic <sup>®</sup> -710 Base Lo-VOC                           |
|---|---|--|
| Company name  | : | Sika Corporation   |
|   |   | 201 Polito Avenue<br>Lyndhurst, NJ 07071<br>USA<br>www.sikausa.com |
| Telephone   | : | (201) 933-8800   |
| Telefax   | : | (201) 804-1076   |
| E-mail address  | : | ehs@sika-corp.com  |
| Emergency telephone                                     | : | CHEMTREC: 800-424-9300<br>INTERNATIONAL: +1-703-527-3887           |
| Recommended use of the chemical and restrictions on use | : | For further information, refer to product data sheet.              |

## **SECTION 2. HAZARDS IDENTIFICATION**

# GHS classification in accordance with the OSHA Hazard Communication Standard (29 CFR 1910.1200)

| Flammable liquids   | : | Category 3                       |
|---|---|----------------------------------|
| Respiratory sensitization   | : | Category 1                       |
| Skin sensitization  | : | Category 1                       |
| Carcinogenicity (Inhalation)  | : | Category 1A                      |
| Specific target organ toxicity<br>- repeated exposure (Inhala-<br>tion) | : | Category 1                       |
| GHS label elements  |   |                                  |
| Hazard pictograms   | : |                                  |
| Signal Word   | : | Danger                           |
| Hazard Statements   | : | H226 Flammable liquid and vapor. |
|   |   | 1 / 10                           |

| Revision Date 05/16/2024 | Print Date 05/16/2024  |
|--------------------------|--|
|                          | H317 May cause an allergic skin reaction.<br>H334 May cause allergy or asthma symptoms or breathing diffi-<br>culties if inhaled.<br>H350 May cause cancer by inhalation.<br>H372 Causes damage to organs through prolonged or repeated<br>exposure if inhaled.  |
| Precautionary Statements | Prevention:  |
|                          | <ul> <li>P201 Obtain special instructions before use.</li> <li>P202 Do not handle until all safety precautions have been read and understood.</li> <li>P210 Keep away from heat/ sparks/ open flames/ hot surfaces.</li> <li>No smoking.</li> <li>P233 Keep container tightly closed.</li> <li>P240 Ground/bond container and receiving equipment.</li> <li>P241 Use explosion-proof electrical/ ventilating/ lighting/ equipment.</li> <li>P242 Use only non-sparking tools.</li> <li>P243 Take precautionary measures against static discharge.</li> <li>P260 Do not breathe mist or vapors.</li> <li>P264 Wash skin thoroughly after handling.</li> <li>P270 Do not eat, drink or smoke when using this product.</li> <li>P272 Contaminated work clothing must not be allowed out of the workplace.</li> <li>P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.</li> <li>P284 Wear respiratory protection.</li> </ul> |
|                          | Response:  |
|                          | <ul> <li>P303 + P361 + P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/ shower.</li> <li>P304 + P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing.</li> <li>P308 + P313 IF exposed or concerned: Get medical advice/ attention.</li> <li>P333 + P313 If skin irritation or rash occurs: Get medical advice/ attention.</li> <li>P342 + P311 If experiencing respiratory symptoms: Call a POISON CENTER/ doctor.</li> <li>P362 + P364 Take off contaminated clothing and wash it before reuse.</li> <li>P370 + P370 In second official black drugond, drugond and second.</li> </ul>  |
|                          | P370 + P378 In case of fire: Use dry sand, dry chemical or alco-<br>hol-resistant foam to extinguish.  |
|                          | <b>Storage:</b><br>P403 + P235 Store in a well-ventilated place. Keep cool.<br>P405 Store locked up.   |
|                          | <b>Disposal:</b><br>P501 Dispose of contents/ container to an approved waste disposal plant.   |

### Revision Date 05/16/2024

Print Date 05/16/2024

### **Additional Labeling**

There are no ingredients with unknown acute toxicity used in a mixture at a concentration >= 1%.

### Other hazards

Intentional misuse by deliberate concentration and inhalation of vapor may be harmful or fatal.

## SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

#### Mixtures

#### Components

| Chemical name                                   | CAS-No.    | Classification  | Concentra-<br>tion (% w/w) |
|---|------------|---|----------------------------|
| solvent naphtha (petroleum), medi-<br>um aliph. | 64742-88-7 | Flam. Liq. 3; H226<br>Asp. Tox. 1; H304   | >= 5 - < 10                |
| Quartz (SiO2) >5µm                              | 14808-60-7 | Carc. 1A; H350<br>STOT RE 1; H372<br>STOT SE 3; H335  | >= 1 - < 5                 |
| 2-methyl-m-phenylene diisocyanate               | 584-84-9   | Acute Tox. 1; H330<br>Skin Irrit. 2; H315<br>Eye Irrit. 2A; H319<br>Resp. Sens. 1; H334<br>Skin Sens. 1; H317<br>Carc. 2; H351<br>STOT SE 3; H335 | >= 0.1 - < 1               |
| 2-methyl-m-phenylene diisocyanate               | 91-08-7    | Acute Tox. 1; H330<br>Skin Irrit. 2; H315<br>Eye Irrit. 2A; H319<br>Resp. Sens. 1; H334<br>Skin Sens. 1; H317<br>Carc. 2; H351<br>STOT SE 3; H335 | >= 0.1 - < 1               |

Actual concentration is withheld as a trade secret

## SECTION 4. FIRST AID MEASURES

| General advice          | : | Move out of dangerous area.<br>Consult a physician.<br>Show this material safety data sheet to the doctor in attend-<br>ance.              |
|-------------------------|---|--|
| If inhaled              | : | Move to fresh air.<br>Consult a physician after significant exposure.  |
| In case of skin contact | : | Take off contaminated clothing and shoes immediately.<br>Wash off with soap and plenty of water.<br>If symptoms persist, call a physician. |
| In case of eye contact  | : | Remove contact lenses.   |

| Revision Date 05/16/2024  | Print Date 05/16/2024  |
|---|--|
|   | Keep eye wide open while rinsing.<br>If eye irritation persists, consult a specialist.   |
| If swallowed :  | Clean mouth with water and drink afterwards plenty of water.<br>Do not induce vomiting without medical advice.<br>Do not give milk or alcoholic beverages.<br>Never give anything by mouth to an unconscious person.<br>Obtain medical attention.  |
| Most important symptoms :<br>and effects, both acute and<br>delayed | sensitizing effects<br>Asthmatic appearance<br>Allergic reactions<br>May cause an allergic skin reaction.<br>May cause allergy or asthma symptoms or breathing difficul-<br>ties if inhaled.<br>May cause cancer by inhalation.<br>Causes damage to organs through prolonged or repeated<br>exposure if inhaled. |
| Notes to physician :  | Treat symptomatically.   |

## **SECTION 5. FIRE-FIGHTING MEASURES**

| Suitable extinguishing media                   | : | Alcohol-resistant foam<br>Carbon dioxide (CO2)<br>Dry chemical  |
|--|---|---|
| Unsuitable extinguishing media                 | : | Water   |
| Further information                            | : | Use water spray to cool unopened containers.<br>Collect contaminated fire extinguishing water separately. This<br>must not be discharged into drains.<br>Fire residues and contaminated fire extinguishing water must<br>be disposed of in accordance with local regulations. |
| Special protective equipment for fire-fighters | : | In the event of fire, wear self-contained breathing apparatus.  |

## SECTION 6. ACCIDENTAL RELEASE MEASURES

| Personal precautions, protec- :<br>tive equipment and emer-<br>gency procedures | Use personal protective equipment.<br>Remove all sources of ignition.<br>Deny access to unprotected persons.<br>Beware of vapors accumulating to form explosive concentra-<br>tions. Vapors can accumulate in low areas. |
|---|--|
| Environmental precautions :   | Prevent product from entering drains.<br>If the product contaminates rivers and lakes or drains inform<br>respective authorities.<br>Local authorities should be advised if significant spillages                        |
|   | 4/40   |

| ion Date 05/16/2024                                      |     | Print Date 05   |
|--|-----|---|
|  |     | cannot be contained.  |
| Methods and materials for<br>containment and cleaning up | :   | Contain spillage, and then collect with non-combustible ab-<br>sorbent material, (e.g. sand, earth, diatomaceous earth, ver-<br>miculite) and place in container for disposal according to local<br>/ national regulations (see section 13).  |
| TION 7. HANDLING AND STO                                 | DR/ | AGE   |
| Advice on protection against fire and explosion          | :   | Keep away from heat/ sparks/ open flames/ hot surfaces. No<br>smoking.<br>Take precautionary measures against electrostatic discharg-<br>es.  |
| Advice on safe handling                                  | :   | <ul> <li>Avoid formation of aerosol.</li> <li>Do not breathe vapors or spray mist.</li> <li>Avoid exceeding the given occupational exposure limits (see section 8).</li> <li>Do not get in eyes, on skin, or on clothing.</li> <li>For personal protection see section 8.</li> <li>Persons with a history of skin sensitization problems or asthma, allergies, chronic or recurrent respiratory disease should not be employed in any process in which this mixture is being used.</li> <li>Smoking, eating and drinking should be prohibited in the application area.</li> <li>Take precautionary measures against static discharge.</li> <li>Open drum carefully as content may be under pressure.</li> <li>Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapors).</li> <li>Follow standard hygiene measures when handling chemical products.</li> </ul> |
| Conditions for safe storage                              | :   | Store in original container.<br>Keep in a well-ventilated place.<br>Containers which are opened must be carefully resealed and<br>kept upright to prevent leakage.<br>Observe label precautions.<br>Store in accordance with local regulations.   |
| Materials to avoid                                       | :   | Explosives<br>Oxidizing agents<br>Poisonous gases<br>Poisonous liquids  |

## SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

## Ingredients with workplace control parameters

| Components | CAS-No. | Value type | Control parame- | Basis |
|------------|---------|------------|-----------------|-------|
|            | F       | 140        |                 |       |
| 5 / 16     |         |            |                 |       |

The above constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.

| Engineering measures        | :  | Use of adequate ventilation should be sufficient to control<br>worker exposure to airborne contaminants. If the use of this<br>product generates dust, fumes, gas, vapor or mist, use pro-<br>cess enclosures, local exhaust ventilation or other engineer-<br>ing controls to keep worker exposure below any recommend-<br>ed or statutory limits.<br>The engineering controls also need to keep gas, vapor or<br>dust concentrations below any lower explosive limits. |
|-----------------------------|----|--|
| Personal protective equipme | nt |  |
| Respiratory protection      | :  | Use a properly fitted NIOSH approved air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.   |
|                             |    | The filter class for the respirator must be suitable for the max-<br>imum expected contaminant concentration<br>(gas/vapor/aerosol/particulates) that may arise when han-<br>dling the product. If this concentration is exceeded, self-<br>contained breathing apparatus must be used.  |
| Hand protection             | :  | Chemical-resistant, impervious gloves complying with an<br>approved standard should be worn at all times when handling<br>chemical products if a risk assessment indicates this is nec-<br>essary.   |
| Eye protection              | :  | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary.  |
| Skin and body protection    | :  | Choose body protection in relation to its type, to the concen-<br>tration and amount of dangerous substances, and to the spe-<br>cific work-place.   |
| Hygiene measures            | :  | Avoid contact with skin, eyes and clothing.<br>Wash hands before breaks and immediately after handling<br>the product.<br>Remove respiratory and skin/eye protection only after vapors<br>have been cleared from the area.<br>Remove contaminated clothing and protective equipment<br>before entering eating areas.<br>Wash thoroughly after handling.  |

Not classified due to lack of data.

### **Further information**

#### Product:

Remarks

: Carbon black (1333-86-4) <u>Animal Toxicity:</u> Rat, oral, duration 2 year Effect: no tumors

> Mouse, oral, duration 2 years Effect: no tumors Mouse, dermal, duration 18 months Effect: no skin tumors Rat, inhalation, duration 2 years Target organ: lungs Effect: inflammation, fibrosis, tumors Note: Tumors in the rat lung are considered to be related to the "particle overload phenomenon" rather than to a specific chemical effect of carbon black itself in the lung. These effects in rats have been reported in many studies on other poorly soluble inorganic particles and appear to be rat specific. Tumors have not been observed in other species (i.e., mouse and hamster) for carbon black or other poorly soluble particles under similar circumstances and study conditions. Mortality studies (human data): A study on carbon black production workers in the UK (Sorahan, 2001) found an increased risk of lung cancer in two of the five plant studied; however, the increase was not related to the dose of carbon black. Thus, the authors did not consider the increased risk in lung cancer to be due to carbon black exposure. A German study of carbon black workers at one plant (Morfeld, 2006; Buechte, 2006) found a similar increase in lung cancer risk but, like the Sorohan, 2001 (UK study) found no association with carbon black exposure. A large US study of 18 plants showed a reduction in lung cancer risk in carbon black production workers (DEII, 2006). Based upon these studies, the February 2006 Working Group at the International Agency for Research on Cancer (IARC) concluded that the human evidence for carcinogenicity was inadequate (IARC, 2010). Since the IARC evaluation of carbon black, Sorahan and Har-

Revision Date 05/16/2024

Print Date 05/16/2024

rington (2007) have re-analyzed the UK study data using an alternative exposure hypothesis and found a positive association with carbon black exposure in two of the five plants. The same exposure hypothesis was applied by Morfeld and McCunney (2009) to the German cohort; in contrast, they found no association between carbon black exposure and lung cancer risk and, thus, no support for the alternative exposure hypothesis used by Sorahan and Harrington. Overall, as a result of these detailed investigations, no causative link between carbon black exposure and cancer risk in humans has been demonstrated.

**IARC CANCER CLASSIFICATION:** In 2006 IARC re-affirmed its 1995 finding that there is "inadequate evidence" from human health studies to assess whether carbon black causes cancer in humans. IARC concluded that there is "sufficient evidence" in experimental animal studies for the carcinogenicity of carbon black. IARC's overall evaluation is that carbon black is "possibly carcinogenic to humans" (Group 2B)". This conclusion was based on IARC's guidelines, which generally require such a classification if one species exhibits carcinogenicity in two or more animal studies (IARC, 2010).

Solvent extracts of carbon black were used in one study of rats in which skin tumors were found after dermal application and several studies of mice in which sarcomas were found following subcutaneous injection. IARC concluded that there was "sufficient evidence" that carbon black extracts can cause cancer in animals (Group 2B).

**ICGIH CANCER CLASSIFICATION:** Confirmed Animal Carcinogen with Unknown Relevance to Humans (Category A3 Carcinogen).

**ASSESSMENT:** Applying the guidelines of self-classification under the Globally Harmonized System of Classification and Labeling of Chemicals, carbon black is not classified as a carcinogen. Lung tumors are induced in rats as a result of repeated exposure to inert, poorly soluble particles like carbon black and other poorly soluble particles. Rats tumors are a result of a secondary non-genotoxic mechanism that has questionable relevance for classification in humans. In support of this opinion, the CLP Guidance for Specific Target Organ Toxicity - Repeated Exposure (STOT-RE), cites lung overload under mechanisms not relevant to humans. Human health studies show that exposure to carbon black does not increase the risk to carcinogenicity.

## Titanium dioxide (13463-67-7)

In lifetime inhalation studies of rats, airborne respirable-size titanium dioxide particles have shown to cause an increase in lung tumors at concentrations associated with substantial particle lung burdens and consequential pulmonary overload and inflammation. The potential for these adverse health ef-

Revision Date 05/16/2024

Print Date 05/16/2024

fects appears to be closely related to the particle size and the amount of the exposed surface area that comes into contact with the lung. However, tests with other laboratory animals such as mice and hamsters, indicate that rats are significantly more susceptible to the pulmonary overload and inflammation that causes lung cancer. Epidemiological studies do not suggest an increased risk of cancer in humans from occupational exposure to titanium dioxide. Titanium dioxide has been characterized by IARC as possibly carcinogenic to humans (Group 2B) through inhalation (not ingestion). It has not been characterized as a potential carcinogen by either NTP or OSHA.

Quartz (14808-60-7): This classification is relevant when exposed to Quartz (silicon dioxide) in dust or powder form only, including cured product that is subject to sanding, grinding, cutting, or other surface preparation activities.
