LITHOHARD

DENSIFIER - HARDENER - DUSTPROOFER

SINAK LithoHard is a ready to use, zero VOC permanent, penetrating densifier that hardens and dustproofs new and existing concrete. LithoHard is designed for use on interior hard steel troweled finished concrete.

LithoHard's environmentally friendly, truly spray and walk away formula eliminates scrubbing, rinsing, and costly disposal of wasted product. LithoHard can be installed as soon as 5 days after concrete placement. This system will save weeks off the construction schedule while significantly cutting labor costs.

LithoHard treated surfaces continue to shine with time and sustained use. LithoHard provides increased slip resistance, both wet and dry and can be used on color concrete. SINAK warrants that concrete treated with LithoHard will remain hardened and dustproof for more than 20 years.

20-YEAR
DUSTPROOF WARRANTY

NO SCRUBBING REQUIRED
