SUSTAINABLE BUILDING SOLUTIONS

ENHANCE COLORED CONCRETE

MATTE-20 MATTE FINISH CONCRETE SEALER

SINAK MATTE-20 is a VOC compliant sealer that provides etch and stain resistance with a matte finish. This spray applied coating is designed for protecting interior/exterior concrete, epoxy, gypsum, methyl methacrylate, polyurethane, wood and terrazzo against chemical intrusion and staining.

MATTE-20 offers ultimate protection and will not require reapplication for a minimum of five years. MATTE-20 provides a chemically stable solution that is UV stable and will not cloud or blush over time. MATTE-20 is easy to apply and does not require backrolling, microfibering or burnishing.

The versatility of SINAK's sealer technology is unparalleled in the industry and offers a unique product solution that provides long term protection for interior and exterior surfaces. Contact SINAK for a sample and quote for your next project.
