

TREMPROOF® PUMA & TREMPROOF® 6100

A Side-by-Side Comparison of Cold- and Hot-Applied Waterproofing Membrane Options for Maximum Versatility and Protection in Horizontal Applications

Waterproofing Designed for Protection & Durability

Tremco provides comprehensive waterproofing solutions for a variety of horizontal applications. A cold-applied waterproofing system that utilizes polyurethane-methacrylate (PUMA) technology, TREMproof® PUMA offers superior elongation over traditional MMA/PMMA systems. PUMA waterproofing systems have more than a decade of proven performance in heavy-duty and complex applications such as bridges. TREMproof PUMA systems offer savings by reducing construction cycles and eliminating the need for kettles and reinforcement, while still providing long-term performance and durability. TREMproof PUMA also allows easier repair of damaged areas that may occur as a result of abuse by other trades on the jobsite. TREMproof® 6100 is a 100% solid, hot-applied rubberized asphalt system with a 50-plus year performance history.

TREMproof PUMA and 6100 Systems:

- Can be used in horizontal waterproofing applications including plaza decks, planters, parking decks, tunnels and vegetated roofs
- Tested extensively for adhesion and compatibility with Tremco's high-performance coatings and sealants
- Specific connectivity details available to ensure that a single-source warranty is achieved, if so desired
- Comprehensive warranty for all components of the assembly when applied in accordance with Tremco's published application instructions

Tremco's System Warranty Includes*:

- Watertightness of Membrane
- Thermal Retention of Insulation
- Performance of Chosen Paver System
- Components of Vegetated Roof System
- Removal and Replacement of Overburden

** Contact Your Local Tremco Representative for Project Specific Warranty Terms and Conditions*

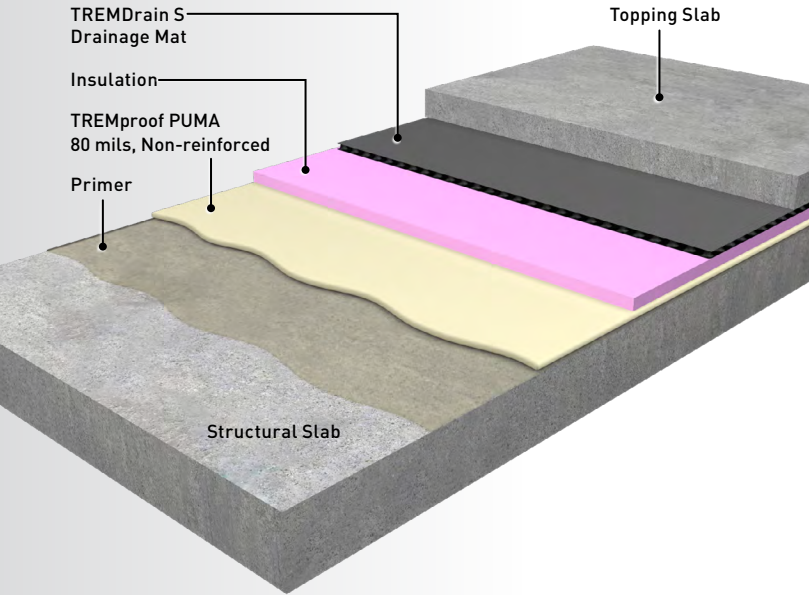

FEATURES	TREMproof® PUMA	TREMproof® 6100
Kettle Required	No	Yes
Primer Required	Yes (after forms removed)	Yes
Daily Application Estimate (Four-man Crew)	5,000+ ft ² /day	2,000+ ft ² /day
Watertight Warranty Option	Up to 25 years	Up to 20 years
Mil Thickness	80 mils	215 mils
Reinforcing Fabric Required	No*	Yes
Single-Lift Application	Yes	No
Crack-bridging	Pass	Pass
Protection Course Required	No	Yes

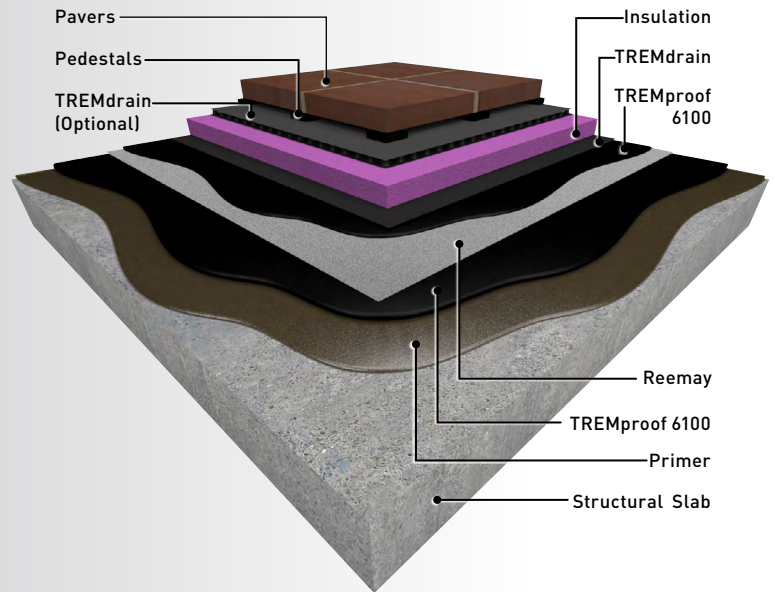

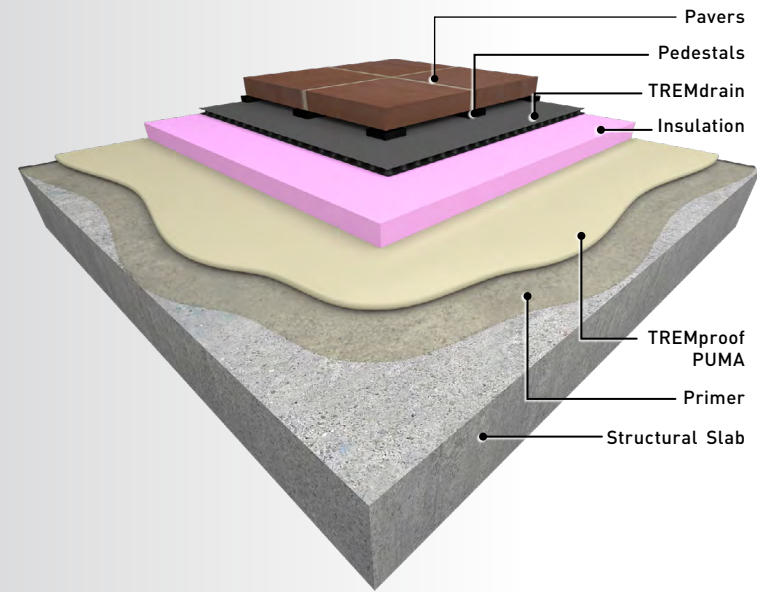

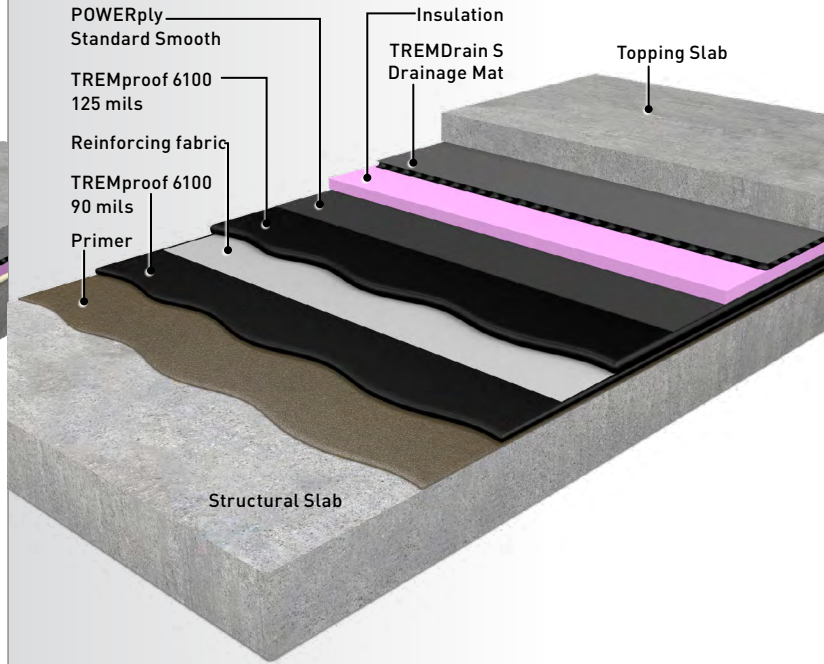

***Tremco advises against the use of reinforcing fabric in any of its cold-fluid solutions because it diminishes the movement of the membrane. Use of reinforcing fabric in the system may limit or alter warranty terms.**

Information may vary by region. For specific information, please contact your local Tremco CSW representative.
