## DESCRIPTION

The industry-leading 2in diameter Wind-Devil®2 (1,000/bx) is by far the most popular and technologically advanced EIFS mechanical fastening system on the market. The patented "bull's-eye" closure arms allow easy, efficient backing out of any screw, saving time and money. Also eliminates wall-spotting from moisture after the finish coat is applied.

The Wind-Devil2 is designed and engineered for use with polymer-based (PB) Exterior Insulation and Finish Systems (EIFS). It allows the attachment of EPS insulation to a variety of substrates, including wood, lite metal, steel and masonry. Our witnessed negative wind-load testing (ASTM-E330) continues to set the industry standard for attaching EIFS. The Wind-Devil 2 fastening system is engineered to be applied in any weather condition. Also Available in [250pk](#) and [500pk](#).
